**OBJECTIVE:** To provide students an opportunity to find out what career will fit their interests and abilities best, research the suggested career choices, choose and research one career that most interests the student, and set goals to attain a career in their selected career choice. To provide students an opportunity to practice their presentation skills and communicate the results of their career search to their peers and adults.

**OVERVIEW:** Background: As we know life doesn't always work out how we plan. The career a person chooses without any prior knowledge of their interests and abilities could be a choice that will burden them for the rest of their working career. By taking aptitude tests and filling out career surveys, people can find out what profession is most suitable for each individual's interests and abilities. Then, choose a career that will be more rewarding.

This contest is an individual event in which students will use resources provided on the internet such as surveys, aptitude tests, and questionnaires to discover what profession/career would be most suitable to their interests and abilities. The student will then research the career and set goals that will lead to the chosen career and present their findings to judges as a slide deck presentation. The presentation should encapsulate the basics of the career as well as key milestones, education needed, and goal process/plan.2 Participants must prepare a display board that will be used in the oral presentation to present their findings. The display board may be no larger than 36" x 48".
