GENERAL COMPETITION INFORMATION CONT.

Judging and Scoring

- Scoring is based on the posted individual competition rubric.
- Final scores will be based on a scaled score. Scaled scores are calculated through a number of methods including judges tie breakers and room normalizations.
- Judges will break ties in all competitive events.
- To accommodate a large number of competitors, we use multiple rooms each with its own set of judges. To ensure fairness across these rooms, we employ a well-established mathematical method to normalize scores. This method helps balance judge subjectivity and ensures all competitors have a fair shot, regardless of their assigned room.
- In each competitive event, each competitor gets an average score from the judges. That score is averaged with the partner judge. If there is a deviation of more than one standard deviation between rooms, the two rooms are normed against one another to that deviation. Final scores used for ranking are the normalized (also known as scaled scores).
- When normalizing scoring, perfect scores will be excluded from the normalization process. If more than one student in the same division in the same competition receives a perfect score, a second set of judges will review the recorded presentations for those students to make a final decision.

Awards

- For Competitions: Medals and certificates will be presented to the top three entries in each division for individual competitions. Trophies and certificates will be presented to the top three entries in each division for team competitions. All places will receive electronic certificates after the conference.
- For Contests: Ribbons will be awarded to students in each category in each division with scores as follows:
 - Blue-Scores 98-100
 - Red-Scores 94-97
 - White-Scores 90-93

Inquiry Process

- Following the conference, the student scores will be released directly to the participating student(s). The scores will provide individual judges' scores, the average score for the two judges, and the normalized score (if necessary.)
- Students will have 3 business days to file an inquiry regarding the validity of their score. Students will be required to complete the online inquiry request form and submit all required documentation for consideration. **No appeal will be accepted after the 3-day period.**
- Staff will review the scoring and respond to the inquiry within 30 days. **All decisions are final.**

RESEARCHING LEARNING CHALLENGES COMPETITION

COMPETITION TYPE: Team — Closed to spectators

ELIGIBILITY LEVELS: High School Junior Varsity, High School Varsity, Collegiate

EDUCATORS RISING STANDARDS:

- Standard I: Understanding the Profession
- Standard II: Learning About Students
- Standard VI: Using Assessments and Data
- Standard VII: Engaging in Reflective Practice

Contest Purpose

Approximately 7.5 million students (15% of all public-school students) in American public schools have been diagnosed with learning disabilities and receive special education services. (Citation: <https://nces.ed.gov/programs/coe/indicator/cgg/students-with-disabilities>) Understanding how to support students with special needs is central to success as an educator. This competition offers Educators Rising students the opportunity to explore deeply and to develop recommendations regarding effective educational supports for students with special needs.

The Individuals with Disabilities Education Act (IDEA) groups students into fourteen disability categories. They are:

- | | |
|----------------------------|---|
| 1. Autism | 8. Multiple disabilities |
| 2. Deaf-blindness | 9. Orthopedic impairment |
| 3. Deafness | 10. Other health impairments |
| 4. Developmental delay | 11. Specific learning disability (e.g., dyslexia) |
| 5. Emotional disturbance | 12. Speech or language impairment |
| 6. Hearing impairment | 13. Traumatic brain injury |
| 7. Intellectual disability | 14. Visual impairment, including blindness |

This year's competition focuses on the specific learning disability involving hearing impairment.

According to the National Center for Education Statistics digest of the U.S. Department of Education's 2022–2023 IDEA Section 618 data collection, approximately 70,000 students ages 3–21 in U.S. public schools were served under the category of hearing impairments, representing about 1% of all students with disabilities served under IDEA Part B (NCES, December 2023).

Students with hearing impairments may experience challenges in communication, language development, and academic achievement. Additionally, the National Deaf Center on Postsecondary Outcomes notes that deaf and hard-of-hearing students are less likely to graduate from high school and enroll in postsecondary education compared to their hearing peers ([National Deaf Center, 2020](#)).

The purpose of this competition is to work collaboratively to learn more about this specific learning challenge and to produce a research-supported position paper and presentation to explain and advocate for positive practices in schools to support the education of students with hearing impairments. Imagine that the local school board has asked you: "What specific steps should we take to support the education of students with hearing impairments?"

How can inclusive education be optimized for students with hearing impairments? Also, why should we accept your recommendations?

Team members should research the educational experiences, challenges, and supports for students with hearing impairments in K-12 schools and recommend the best practices to support the education of students with this learning challenge. You are encouraged to embark on this research using traditional sources as well as primary sources (ex. conducting interviews with individuals impacted by this disability or professionals who support individuals with this disability, etc.). Then team members should discuss the research in order to determine recommendations for their paper and presentation.

Team members will collaborate on a research-supported position paper, which will be no shorter than four full pages and no longer than six full pages, to offer their recommendations. The minimum number of student collaborators is two, but there is no maximum. The position paper must include cited references (MLA, APA, or Chicago style are acceptable) and a works cited sheet, which will not count toward the four-to-six-page length requirement. (Also, the title page doesn't count toward the length requirement. If you are unable to reach the minimum length required, resume the research process — there is a lot of quality material out there on this topic.) The position paper will be submitted with the competition application and will be scored by judges prior to the national conference.

Competition Guidelines

There are two components to this competition:

- *A position paper, submitted and scored by judges prior to the national conference, and*
- *An interactive session (including a presentation) with judges on-site at the national conference.*

- A. Team members will use the information collected in the research phase to collaborate in creating two products: a position paper and a slide deck presentation.
- B. The position paper will include a title page, a works cited page (using MLA, APA, or Chicago citation style), and four to six full pages of research-supported recommendations with appropriate context. The works cited and title pages will not count towards the four-to-six-page length. The position paper must be submitted online.
- C. The slide deck presentation (ex. PowerPoint, Prezi) should engagingly complement and deliver the team's research findings and recommendations.
- D. At the Educators Rising National Conference, qualifying representatives (two to four students) must present to a panel of expert judges for up to 10 minutes about their research using the slide deck as their visual aid. Students will also respond to judges' questions on the assigned topic and presentation; the entire interactive session with judges may last up to 15 minutes.
- E. Team members should bring the file of their slide deck on a USB drive.
